THE UNIVERSITY OF ALBERTA STAFF BULLETIN

EDMONTON 7, ALBERTA

JANUARY 8, 1970

## GENERAL FACULTY COUNCIL MINUTES

A meeting of General Faculty Council was held on Monday, December 15, 1969 and the following were among the items discussed.

### OPEN MEETINGS OF GENERAL FACULTY COUNCIL COMMITTEES

The Executive Committee had recommended that each committee of General Faculty Council be permitted to decide whether it wished to hold open meetings, and that any committee deciding to do so should define what it means by "open meetings."

Previously, meetings of all General Faculty Council committees were closed and reports emanating from these committees were to be regarded as confidential until they were

discussed by General Faculty Council.

Meetings of General Faculty Council were opened to the public in 1968, and since that time have been attended by representatives of the news media, students, members of faculty, and members of the public.

### WATER RESOURCES CENTRE

The Council discussed a proposal to establish a Water Resources Centre at The University of Alberta and received a submission from a committee which had been established under the chairmanship of W. M. SCHULTZ of the Department of Agricultural Economics. General Faculty Council endorsed the proposal without commitment to budget, and the proposal has now been sent to the University Planning Committee for its consideration.

### DEPARTMENT OF SLAVIC LANGUAGES

The Council approved a recommendation that the name of the Department of Slavonic Languages and Literature be changed to the Department of Slavic Languages.

### COMMUNITY SERVICES ON THE CAMPUS

The existing policy of the Board of Governors is to prohibit the involvement of private enterprise in the provision of community services on campus; the two notable exceptions are the Students' Union franchises for the Canadian Imperial Bank of Commerce and the Students' Union Barber Shop. The Board's Building Committee is reviewing the policy and had asked a number of groups to make comments and recommendations with respect to possible amendment of the policy. One of these groups was General Faculty Council.

The Council approved a recommendation of its Executive Committee that an *ad hoc* Committee with wide representation be formed to consider proposals regarding community services as to the principles involved and the degree to which the proposals would apply. Since the meeting of the Council, the Executive Committee has set up the *ad hoc* Committee and it includes representatives of General Faculty Council, the Deans' Council, the University Planning Committee, the Campus Development Committee, the Graduate Students' Association, the Students' Union, the AASUA and the Non-Academic Staff Association.

## CONTRACT AWARDED FOR BASIC MEDICAL SCIENCES BUILDING

The contract for the Basic Medical Sciences Building phase I has been awarded at a saving of more than \$1,000,000 below the original cost estimate.

Burns and Dutton Construction (1962) Limited was successful among eight bidders with its price of \$6,008,112. The six-storey building with about 252,000 gross square feet of space was expected to cost \$7,150,000.

There are a number of major reasons for the savings, according to W. D. NEAL, Vice-President, Planning and Development.

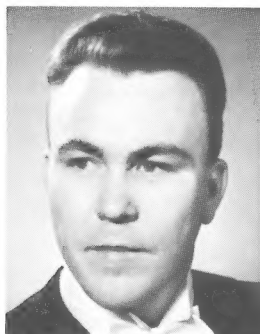

One was the tendering procedure which allowed for a number of alternate bids on specific aspects of the building in addition to the basic bids for the total project. Alternate bids were received on such things as various types of floor covering, different kinds of partitioning and door frame systems and various types of case work where different materials and finishes were considered.

Alternate bids were opened first, considered and then accepted or rejected. These considerations then were incorporated in the total bid and the contract awarded on the results.

Another major reason for the lower price was the close co-operation among all those involved in the building's planning, RONALD CLARKE, Director of Planning for the Health Sciences Centre, T. A. GROVES of Aberdeen Groves Hodgson, architectural consultant, members of the Faculty of Medicine, and the Campus Development Office.

A third factor was the extremely competitive bidding. The other bids were: Poole Construction Limited, \$6,060,998; Smith Brothers and Wilson Limited, \$6,103,350; Alta-West Construction Limited, \$6,127,761; Laing Construction and Equipment Limited, \$6,165,282; Janin Western Contractors Limited, \$6,178,112; Universal Construction Company Limited, \$6,263,163 and Bird Construction Company Limited, \$6,466,206.

Basic Medical Sciences, phase I, the second major building of the Health Sciences Centre, will be located adjacent to 114 Street south of the Alberta Research Council

Dr. Read

FREDERICK DOUGLAS READ, Associate Professor of Dentistry, died December 17, after a short period of hospitalization.

Dr. Read was born in Provost, Alberta in 1920. He attended The University of Alberta, obtaining a BSc in 1950 and DDS in 1952. He joined the Faculty of Dentistry on a part-time basis in 1959, and in 1968 he was appointed to permanent full-time staff.

The funeral was held Friday afternoon, December 19, at St. George's Anglican Church. Dr. Read is survived by his wife and four children.

and, a long narrow building, will run parallel to 89 Avenue.

Its six storeys plus basement will provide teaching and research space for the Departments of Anatomy, Bacteriology, and Biochemistry, and the Cancer Research Unit (McEachern Laboratory).

Phase I represents approximately half of the total Basic Medical Sciences Building. Phase II will add three storeys to phase I, and phase III will be a nine storey extension to the east.

#### OTHER NEW FACILITIES

The contract for off campus agriculture and science facilities has been awarded to Smith Brothers and Wilson Limited for a contract amount of \$633,800, the lowest of eleven bids. The facilities, on which bids early in the fall were rejected as too high, include a Genetics Field Laboratory, a Sow Nutrition Building which will house up to 72 experimental brood sows, Horticultural Greenhouse and head house, a storage building and compound for the Department of Agricultural Engineering, and, for Laboratory Animal Sciences, a rodent breeding building, an aviary, and extensions to the Sciences and Health Sciences wings. Contract completion date is September 1, 1970.

Tenders are out now and will close January 20 for the Law Centre, to be constructed in the vicinity of 89 Avenue and 111 Street.

The Department of Public Works of the Province of Alberta has invited tenders for phase IIB of the utilities services tunnel, which will extend from 114 Street and 89 Avenue north along the west side of the Civil and Electrical Engineering Building,

then east past the power plant and Rutherford Library and south paralleling 112 Street to 89 Avenue. Tenders close January 8 for the services tunnel and work should commence later in the month. This project will cause some temporary inconvenience for pedestrian and motor traffic, and FOLIO will publish a map showing the route of the tunnel and provisions made for traffic.

#### CONSTRUCTION REPORT

In contrast to the projects which soon will be started, a number of projects were listed as complete in the December 15 progress report of the Campus Development Office.

The North Wing of the Cameron Library was accepted as substantially complete on November 21; the moving of some 500,000 volumes into the North Wing was completed by the Library by December 3. The temporary building for Student Health Services is finished and moving-in operations are complete as well.

The progress report listed the car park as 84 per cent complete; the completion schedule was moved ahead to January 15 to allow for completion of the walkway to the Students' Union Building. Part of the structure was available for parking by December 4.

Ground works, including soft landscaping, irrigation, roads and parking lots were substantially complete by mid-November, save for the installation of transformers for the Corbett Hall parking lot and the testing of irrigation lines, which will be done in the spring.

Portions of the Biological Sciences Building also are listed as substantially complete, though casework in some areas is falling behind schedule and is affecting occupancy dates. The general contract for phase II of the building, the Centre wing and Botany wing, is 90 per cent complete now, and progress is slow; progress on phase IIA, the Microbiology wing, is fair and the general contract is now 98 per cent complete. Phases I and III, to house Genetics, Zoology, and Psychology, are substantially complete so far as concerns the general contracts.

Construction continues to progress very well on the addition to the Physical Education and Recreation Centre and the Central Academic Building, respectively 65 and 15 per cent complete.

The deep tunnel sewer, phases II and III, are over half finished. Excavation on phase II is 66 per cent complete and 33 per cent of the concrete has been poured. Phase III excavation is 33 per cent finished.

The trunk sewer, phase IV, is half complete, with 95 per cent of the excavation finished. The addition to the Cooling Plant is progressing according to schedule and should be complete in March. The utilities services tunnel, phase IIA, is progressing favorably. Two-thirds of the overall excavation is complete and half of the concrete floor slab has been poured in the excavated portion.

Projects in the planning stages include Michener Park II, the Fine Arts Building, a second Education Building, North Garneau Library, Engineering II, a second Chemistry Building, a second car park, Arts II, the North Garneau Food Services facility, the Business Administration and Commerce Building, a second Agriculture and second Household Economics Building, Graduate Student Housing, Students' Union Building expansion, and Students' Union Housing.

#### SOCIOLOGY AND ANTHROPOLOGY CONFERENCE HELD AT BANFF

The Western Association of Sociology and Anthropology, in collaboration with the Canadian Sociology and Anthropology Association's Liaison Committee on Education, sponsored a two-part conference combining the eleventh annual meeting of the WASA and a western Canadian conference on sociological and anthropological research in education. The theme of the conference, held at the Banff School of Fine Arts, December 28 to 30, was "Confrontations."

One major session was addressed by a number of native and farm leaders; another session considered "Metropolis vs. Hinterland: the Branch Plant Condition," another, "Whither the University?" and another discussed the planning of future education in Alberta by the Worth Commission. Participants in the "Confrontations" included HAROLD CARDINAL, president of the Indian Association of Alberta; HOWARD ADAMS, president of the Saskatchewan Metis Association; TONY ANTOINE, president of the National Alliance for Red Power; ROY ATKINSON, president of the National Farmers' Union; STAN DANIELS, president of the Metis Association of Alberta; MEL WATKINS of the Political Science Department at the University of Toronto; WALTER H. WORTH of the Commission on Educational Planning; and over thirty academics and graduate students from western Canada and the United States who presented papers.

The WASA annual meeting passed a resolution favoring the upgrading of secondary and university education for native people

of Canada. The resolution called for "more subsidized native students, special or regular, in universities, with a free choice of universities in any country"; "greater research in native culture, past and present"; and "a critical review of history books dealing with the native people, in order to remove traces of racism." It also was resolved that much of the work required for implementation of those resolutions be done by the native people themselves or in close collaboration with them, and that officers of the Association make representation to the universities and other relevant authorities on these matters.

The WASA program was organized by A. K. DAVIS, Professor of Sociology and immediate past president of the Association, and the Education presentations were organized by B. Y. CARD, Professor in the Department of Educational Foundations.

## PEOPLE

- MAX WYMAN and RUTH MAC LENNAN, former Assistant Dean of Women, were married on Wednesday, December 31, in Red Deer.
- Judge V. M. WHITTAKER performed the ceremony at the home of F. P. GALBRAITH, Chancellor of the University. Dr. and Mrs. Galbraith served as witnesses for the ceremony.
- Four papers written by members of the Department of Surgery were selected for presentation at the meeting of the North West Society for Clinical Investigation, held January 3 in Seattle, Washington. The contributors were W. W. YAKIMETS, Assistant Professor of Surgery and Director of Continuing Medical Education, P. A. SALMON, Associate Professor of Surgery, L. COSTOPOULOS, Assistant Clinical Professor of Radiology, A. H. HOBART, Teaching Fellow in Surgery, and M. O. AKPATA and R. CUMMING, graduate students in the Faculty of Medicine.
- EARL SNIDER, Assistant Professor of Sociology, has been elected Vice-Chairman (Chairman elect) of the Edmonton Urban Study Committee. This committee, composed of

---

representatives from local organizations, provincial and federal government departments, was founded in 1967 to assure co-ordination of information among all organizations in Edmonton dealing with urban problems and to initiate research with respect to these problems.

## APPOINTMENTS

The following appointments are effective from January 1.

### BUSINESS ADMINISTRATION AND COMMERCE

D. JOHNSON, Visiting Professor

### SOCIOLOGY

A. MATEJKO, Associate Professor

### GEOGRAPHY

The resignation of B. M. BARR, Assistant Professor (announced in FOLIO on December 11, 1969) has been withdrawn.

## BOOKS

The second edition of *Histology*, a 525 page textbook co-authored by T. S. LEESON, Professor and Chairman of Anatomy and his twin brother, C. R. LEESON, of the Department of Anatomy at the University of Missouri, has been released by W. B. Saunders Company of Philadelphia. This book has the unusual feature of a two part supplementary filmstrip presenting one hundred color exposures of histological slides. The filmstrip may be bought separately or with the book, and with or without a small viewer.

## VISITORS

MARLOW SHOLANDER of Case Western Reserve University at Cleveland, Ohio addressed the Mathematics Colloquium on January 6. On January 8, JOHANN SCHROEDER of Seattle, Washington, spoke to the Colloquium.

## NOTICES

### NAME CHANGE

The Department of Slavonic Languages and Literatures has announced that it has been renamed the Department of Slavic Languages.

### ELEVATOR EMERGENCY TELEPHONES

The Department of Physical Plant is having cabs of several heavily-used elevators equipped with emergency telephones. If an elevator should stop between floors, the telephone will provide a direct connection to an operator, who will immediately call in

emergency service workers to release passengers and put the elevator back into service.

When caught in an elevator, a passenger should remember that, although he is inconvenienced, he is in no danger. Modern elevators are equipped with many safety devices. If an elevator is overloaded or a part malfunctions, the cab is immediately put into a safe "parked" condition. It is a simple matter for a serviceman to release passengers from a car in this condition.

The installation of telephones will be on a trial basis. Elevator users are requested not to abuse the service. The telephone provides an alarm service similar to a fire alarm and should be used in emergencies only. If the trial installations prove satisfactory, it is intended to equip most heavily-used elevator cabs with this facility.

### LIBRARY COLLECTIONS MOVED

The Cameron Library announces that by mid-January the relocation of its collections will be complete. The new arrangement of the classifications on the upper four floors of the library is as follows:

Second floor	Social Sciences (A to F)
Third floor	Social Sciences (G to L)
	Humanities (M to PH)
Fourth floor	Humanities (PJ to PQ)
(north wing)	General Sciences
Fourth floor	General Sciences
Fifth floor	Humanities (PR to PZ)
(north wing)	Social Sciences (U, V)
Fifth floor	Medical Sciences

### BOREAL CIRCLE

The next meeting of the Boreal Circle will be held on Tuesday, January 13 at 8 p.m. in Room 129 of the Education Building. The program will consist of a panel presentation and open discussion on "Intercultural Education in Canada's North" and will be chaired by L. R. GUE, Associate Professor of Educational Administration. Participants in the panel will include students at the University and others with an interest in northern education.

### VISIT TO COMMUNIST-BLOC COUNTRIES

The Faculty of Physical Education, in conjunction with the Academy Travel Limited, London, England, is organizing a three-week tour of the USSR, Hungary, and Czechoslovakia from May 18 to June 8. The purpose of the trip is to look at physical education and sport in these countries. Visits have been arranged to schools, research institutes, and training centres.

The cost of the trip will be approximately \$900 from Edmonton. This covers a charter

flight to London, meals, accommodations, and all transportation. The return flight leaves June 16, allowing a one-week visit in England.

Further information is available from MAX HOWELL, Faculty of Physical Education, at 432-3615.

#### CEA SHORT COURSE

The 18th short course in educational leadership, sponsored by the Canadian Education Association in conjunction with the Department of Educational Administration, will be held from May 18 to 29, 1970 at the Banff School of Fine Arts. The Executive Board has appointed WILLIAM KNILL, Professor of Educational Administration, as director of the course.

The course is designed for school superintendents and inspectors and other senior supervisory officials, and provides the opportunity for interprovincial exchange and discussion of both broad educational issues and specific problems. The course program will be flexible, to accommodate the expressed interests of participants, and will consist of group discussions and addresses by major speakers.

#### GROUP INSURANCE FOR AASUA MEMBERS

At the general meeting held on December 1, the AASUA approved a recommendation of the Group Auto and Home Insurance Committee that the firm of Marsh and McLellan Limited be appointed consulting broker to the Association.

The consulting broker will present his proposed program to the committee this month, and the committee will distribute details of the program to each member of the AASUA. The program will be designed to provide opportunities for better coverage at more favorable rates. Participation of all interested members is invited.

#### PERSONAL NOTICES

*Staff members may forward notices to reach the Editor by 9 a.m. the Friday prior to publication. They must be typed, and not exceed 35 words including heading. Advertisements received will be published at the Editor's discretion.*

WANTED—Person to do dressmaking and alterations, 433-2351.

---

## This week and next

*Listings of events which may interest University staff members must reach the Editor by 9 a.m. the Friday prior to publication. Written notification is preferred. Compiled by GILLIAN BUTLER, 432-4991.*

#### 9 JANUARY, FRIDAY

- SUB Art Gallery* Until 21 January. Exhibition of paintings by IHOR DMYTRUK.
- University Art Gallery* Until 31 January. Exhibition of work by the New Geometric Art Group of Japan. Organized by the Western Association of Art Museums.
- Exhibition of Paintings* Until 15 January. Staff Lounge, 10th floor, Education Building. Eight works by Edmonton painter GINO PEZZANI, Acrylic with bas-relief. The works are available for purchase by contacting BERNARD SCHWARTZ, Department of Elementary Education, at 432-3677, or the artist at his residence, telephone 434-4178.
- Bears Hockey* 8:30 p.m., Varsity Rink, versus the University of Victoria.

#### 10 JANUARY, SATURDAY

- Bears Hockey* 8:30 p.m., Varsity Rink, versus the University of Victoria.

#### 12 JANUARY, MONDAY

- Film Society* 7:30 p.m., Room TL-11, Henry Marshall Tory Building. *Nosferatu*. Directed by F. W. Murnau. Germany, 1922. *The Cat and the Canary*. Director: Paul Leni. USA, 1927. Classic series.

#### 13 JANUARY, TUESDAY

- Philosophy Club* 3:30 p.m., TB-13:15, Henry Marshall Tory Building. MICHAEL MARTIN, Fellow at the Centre for Advanced Study in Theoretical Psychology and Associate Professor with the Philosophy of Science Program, Boston University. "Understanding and Participant Observation in Cultural and Social Anthropology." The public is welcome to attend.
- Boreal Circle* 8 p.m., Room 129, Education Building. "Intercultural Education in Canada's North."

#### 15 JANUARY, THURSDAY

- Humanities Association* 8 p.m., Room LB-2, Henry Marshall Tory Building. WILFRED WATSON, Professor of English. "Marshall McLuhan and the Education of Tribal/Global Man."

#### 16 JANUARY, FRIDAY

- Bears Hockey* 8 p.m., Varsity Rink, versus the University of Saskatchewan, Saskatoon campus.

#### 17 JANUARY, SATURDAY

- Bears Hockey* 8 p.m., Varsity Rink, versus Brandon University.

#### 19 JANUARY, MONDAY

- Film Society* 8:15 p.m., Jubilee Auditorium. Hani's *Inferno of First Love*. Japan, 1968. Main series. English sub-titles.

#### 23 JANUARY, FRIDAY

- SUB Art Gallery* Until 13 February. National Gallery Exhibition of traditional Canadian landscape painting.
- Bears Basketball* 8 p.m., Main Gymnasium, versus the University of Victoria.
